Software Developer

samorha@gmail.com | Thailand | github.com/rungruang-ops | linkedin.com/in/rungruang-samorha-30459333a | rungruang-ops.github.io

SUMMARY

Software Developer with 10 years of experience building web applications and back-end systems for telecom, enterprise and agency clients. Specialized in React, Next.js and Node.js, with hands-on work on OAuth-based SSO, eKYC SIM registration and API integrations. Comfortable owning features end to end, from database design on MSSQL and Supabase to production front ends.

EXPERIENCE

Bedrock Analytics | Software Developer | 2023–Present

- Built the company's single sign-on (SSO) system with React and Next.js, giving 1,000+ users one login across 3+ internal applications.
- Implemented OAuth 2.0 authentication flows, including authorization, token issuing and refresh, and session management.
- Collaborated with 3+ product teams in a large engineering organization to integrate their applications with the SSO platform.

AIS (Advanced Info Service) | Software Developer | 2020–2023

- Developed the online SIM registration system for GOMO by AIS (gomo.th), AIS's digital-only mobile brand, using Node.js and React, covering online SIM ordering, identity verification and SIM activation.
- Built a self-service eKYC activation flow that replaced staff-assisted registration, letting customers activate a SIM on their own in under 5 minutes by scanning the QR code on the SIM, submitting national ID details and verifying through a video call.
- Designed back-end services and data models on MSSQL and Supabase to store customer identity and delivery data in line with NBTC SIM registration requirements.
- Supported 5,000+ customer SIM registrations.

Digix Technology Co., Ltd. | Senior Software Developer | 2015–2019

- Built and maintained Node.js back-end systems for 5+ client applications at a digital transformation consultancy and software house.
- Developed REST APIs on MSSQL powering client mobile apps such as GOMO, Sasin, TCU Bookish, ThaiMagBook and Smart SME Channel.
- Built Angular admin dashboards and contributed to the in-house products TeamLink, an employee engagement platform, and GrowCart, a white-label e-commerce platform.
- Built EDI and API integrations connecting client systems to third-party services.
- Mentored 3+ junior developers.

PROJECTS

- **Video Prompt Builder** (github.com/rungruang-ops/video-prompt-builder): Thai-first AI video prompt builder: a Vite SPA with a Fastify LLM proxy supporting OpenAI, Gemini, Anthropic, xAI, OpenRouter and Ollama. Tech: Vite, Fastify, PostgreSQL, Redis, Docker, Vercel.
- **Byron Nature Classroom** (byron-nature-classroom.vercel.app): Byron's nature classroom, learning about sunlight, water, soil and air by growing plants. Tech: TypeScript, Vercel.

SKILLS

Frontend: React, Next.js, Angular, JavaScript, TypeScript

Backend: Node.js, REST APIs, OAuth 2.0, SSO / authentication

Database: Microsoft SQL Server, Supabase (PostgreSQL)

Tools & Practices: Git, GitHub, Agile/Scrum, Code review

EDUCATION

B.Sc. in Information Technology, Khon Kaen University | 2007–2011

LANGUAGES

Thai (native), English
